A 'business sign' is presented as a content-based sign type with standards only permitting a wall sign, up to 20' above the ground and with a size limit of 1 SF per linear foot of wall area. All other commercial signage types are permitted, except, because of the 20' height limit, signs above first floor level. The commercial part of a building in a mixed-use zone is required to obtain an SUP for signage.	A sign at the entrance to a non-residential portion of a building is permitted as a wall sign, up to 20' above the ground and with a size limit of 1 SF per linear foot of wall area. All other commercial signage types are permitted, except, because of the 20' height limit, signs above first floor level. The commercial part of a building in a mixed-use zone would now be regulated in the sign standards for commercial zones.	Business signs, in connection with any commercial use permitted in the RC, RCX or RD residential zone or in the mixed use zones; provided, that such signs shall be kept within a height of 20 feet above the sidewalk; provided further, that the total area of such signs displayed on any building wall which faces a street, alley or parking area shall not exceed one square foot for each foot of building width facing the street, alley or parking area; provided further, that each commercial use located above the first floor shall be limited to one sign not exceeding one square foot at any entrance to the building.	6. Wall signs at the entrance to a non-residential building or area of a building.	In the higher density apartment zones, there are auxiliary commercial uses (usually a small market, hair salon, dry cleaner, etc.) The current regulations for these would remain effectively unchanged, however, there is a provision in the current ordinance that requies commercial areas of a mixed-use building in a mixed-use zone to obtain an SUP for signage, although mixed use buildings in commercial or residential zones do not have this requirements. This requirement runs counter to City efforts to improve the business friendliness of its zoning regulations.
		Any sign, marquee or awning permitted under section 9-202 for commercial uses shall be permitted on a tract of land in a mixed use zone developed solely for commercial use. If the tract of land is developed for both residential and commercial uses, then signs permitted under section 9-202 for commercial uses may be permitted with a special use permit.	a. Number and Size Limits: A maximum of 1 sign with a maximum size of 1 square feet for each linear foot of building width for the wall on which the sign is mounted.	
			b. Mounting and Installation Regulations: Such sign shall be wall mounted and may only be mounted flat against the wall. Such sign cannot be higher than 20 feet above grade measured from the location immediately below the sign to the top of the sign. Such signs may also be mounted on an awning or marquee. Marquees and awnings are only permitted to encroach upon a public right-of-way if permitted by an enacted encroachment ordinance or which city council has expressly authorized.	
			7. Projecting signs at the entrance to a non-residential building or area of a building:	
			a. Number and Size Limits: A maximum of 1 sign with a maximum size of 16 square feet.	
			b. Mounting and Installation Regulations: Such sign shall be wall mounted. Such sign shall not project more than four feet from the building wall or within one foot of an established curb line and the bottom of the sign is at least eight feet above a sidewalk or parking area and at least 14.5 feet above an alley. Such sign cannot be higher than 20 feet above grade measured from the location immediately below the sign to the top of the sign. Such signs are only permitted to encroach upon a public right-of-way if permitted by an enacted encroachment ordinance or which city council has expressly authorized.	
		Marquees and awnings, except any marquee or awning which serves as a sign background; provided, however, that no marquee or awning, unless otherwise provided in an encroachment ordinance enacted by city council, may be within one foot of or beyond the vertical plane of the curb line, and the bottom of any marquee or awning shall be at least seven feet above the sidewalk. When side arms are used on an awning, the bottom of any side arm at the building shall be at least six feet six inches above the sidewalk when the awning is in use. This section 9-201(A)(15) shall not be construed to supersede the requirement of section 9-104(E).		DELETED
			Sec. 9-202 – Commercial, Special, Overlay, and Mixed Use district signs.

The area allowed for this temporary signage shall be deducted from area allowed for permanent wall signage or other temporary wall signage, as permitted in section b or in Sections 9-201 (A) iii.6 or iii.7 below.
